Computer Science I: Java (UDL Revision)

Course: CSC (PPSC) 1060 1H1
Term: Fall 2026
Source document: `Fall-2026-CSC-(PPSC)-1060-1H1-Computer-Science-I_-Java.pdf` (preserved unchanged)

Start here: How to use this syllabus

- This UDL version keeps the original course requirements, grading, dates, and policies.
- Use the **Quick course details** and **What you need to do** sections first.
- Use **D2L Course** and **D2L Course Content > Table Of Contents** for schedule/details named in the source syllabus.
- The **Formal wording retained from source** appendix preserves source wording for review.
- Any missing or unclear local details are marked as **[INSTRUCTOR CONFIRM]** and should be confirmed before distribution.

Course purpose (plain-language summary + formal wording)

Plain-language summary

This course introduces computer science and Java programming fundamentals. You will practice algorithm development, data representation, logical expressions, sub-programs/functions, and keyboard/file input-output, with intensive lab work outside class.

Formal wording from source

"Introduces students to the discipline of computer science and programming. Algorithm development, data representation, logical expressions, sub-programs and input/output operations using a high-level programming language are covered. Intensive lab work outside of class time is required."

Quick course details

Course and contact details

- Instructor: Michael Harder
- Email: michael.harder@pikespeak.edu
- Division Phone Number: 719-502-3300
- Credit Hours: 4
- Course Attribute: ASE,CTE,MED
- Course Start Date: 17-AUG-26
- Course End Date: 06-DEC-26
- Delivery Method: Hybrid
- Contact Hours: 75 (Lecture 45, Lab 30)
- Class Location: PPSC Centennial Campus, Aspen Building, 250
- Class Meeting Days and Times: Mon 05:30PM-07:50PM & [INSTRUCTOR CONFIRM: source text appears truncated after "&"]
- Drop Date: 02-SEP-26
- Withdraw Date: 12-NOV-26

Important participation requirement

Formal wording from source:
"You must complete at least one academic activity in this course by 11:59 PM on the day before the drop date. If you do not participate by the deadline, you may be dropped from the class for non-participation."

Important dates
- Source text states: "Should include important dates (tests, capstone or final projects due, etc) but this section is optional"
- [INSTRUCTOR CONFIRM: add local important dates if used in this section]

What you need to do (student action checklist)

- Attend required class meetings.
- Complete in-class activities during class and submit by the end of the ICA period.
- Complete assignments/programming projects according to D2L schedule.
- Follow instructor policy that AI use for course work is prohibited in this course.
- Review D2L course schedule and assignment overview:
  - Course Schedule: "See D2L Course"
  - Assignments Overview: "See D2L Course Content > Table Of Contents"
- If you need accommodations, contact ACCESSibility Services as early as possible.

Course time commitment

Formal wording from source:
"General time commitment is 1 to 4 hours per credit hour (including time in class). For a 3 credit hour class, you should expect to spend between 3 and 12 hours (including time in class). For a 4 credit hour class, you should expect 4 to 16 hours. If the class has a lab associated with it, add an additional 2 to 4 hours in addition to the base commitment."

Learning outcomes

Required course learning outcomes
1. Demonstrate the program development process and algorithm development.
2. Convert decimal numbers to and from binary and hexadecimal.
3. Develop programs with thorough consideration of the Software Development Life Cycle (SDLC).
4. Write programs with correct language syntax.
5. Write programs with input/output from the keyboard and file using multiple data types.
6. Demonstrate how operators work with different data types.
7. Identify how data is represented in a computer system.
8. Use logical expressions in a program.
9. Describe scope and lifetime rules.
10. Create programs with multiple decisions and loops.
11. Explain the concept of program flow.
12. Use system and programmer-defined functions and methods with value parameters and/or reference parameters in a program.
13. Describe recursive functions.
14. Differentiate data types in a structure and class.
15. Use pointers and references in a program.
16. Write a program with arrays.
17. Explain object-oriented methodology in program design.
18. Define the object-oriented principles.

Module outcomes (standard competencies)
1. Demonstrate an understanding of the program development process and algorithm development.
2. Implement programs utilizing analysis and design, testing, coding standards and documentation.
3. Write programs with correct syntax.

4. Write programs with input/output using a variety of data types.
5. Demonstrate the use of different data types.
6. Show how operators work with different data types.
7. Identify how data is represented in the system.
8. Use logical expressions in a program.
9. Show how scope/lifetime rules affect code.
10. Write programs with multiple decisions and loops.
11. Explain program flow.
12. Use both system-defined and programmer-defined functions/methods with value and reference parameters in a program.
13. Group different data types together in a structure, class or equivalent.
14. Use pointers/references in a program.
15. Write a program with arrays.
16. Demonstrate understanding and use of recursion in a program.

Topical outline

I. Program development process and algorithm development
II. Software Development Life Cycle (SDLC): Analysis, Design, Testing, Coding standards, Documentation
III. Number conversions: Decimal, Binary, Hexadecimal
IV. Programming language syntax
V. Data types and operators
VI. Data representation
VII. Input/Output from a keyboard
VIII. Logical expressions
IX. Scope and lifetime rules
X. Decisions and iterations
XI. Functions and methods
XII. Arrays
XIII. Input/Output from a file
XIV. Pointers and references
XV. Object-oriented methodology (UML, OOAD)
XVI. Object-oriented principles (Polymorphism, Inheritance, Encapsulation, Abstraction)

Materials

Assessments and grading

Grade distribution (captioned table)

Table 1. Grade Distribution

Category	Points
In Class Activities/Discussion Boards	545
Assignments	375
Programming Projects	715

Midterm Project, Final Exam and Final Project | 465
Total Available | 2100

- Formal note from source: "Final grade will be taken out of 2000 points"

Grading scale (captioned table)

Table 2. Grading Scale

Total Points	Percent	Letter Grade
1800-2000	90-100%	A
1600-1799	80-89.9%	B
1400-1599	70-79.9%	C
1200-1399	60-69.9%	D
0-1199	Less than 60%	F

- Formal note from source: "Grades will be based on these points - grades will not be rounded up. (For example, 1796 points is 89.8% and will be a B)"

Instructor policies (course-specific)

- No Late Work Accepted except for mid-term project with 10% point reduction from total grade for each fraction of a day submitted after due date.
- In Class Activities (ICA) must be completed while present in class and turned in by end of the ICA period for credit. 27.25% point if late for ICA period.
- Classroom attendance is required.
- The use of AI technology to complete assignments, projects, in class activities, tests, quizzes, programming, and any other components of this class is prohibited. Students are expected to complete all components of this class on their own.
- Non Participation: students will be dropped if they do NOT attend a class before Non Participation cut off date.
- If you have learning challenges, please work with your accommodations office to have an approved accommodation letter.
- Accommodation approval are NOT retro active, therefore students needing accommodations need these approved before needing them.

Institutional policies and student support

The source syllabus includes extensive institutional policy text. Major policy/support sections retained:

- Academic Honesty, Plagiarism and Student Conduct
- Digital Literacy Policy
- Artificial Intelligence (AI) Use
- The Ethics of Artificial Intelligence
- Student Use of Artificial Intelligence (AI)
- Acceptable Uses of AI / Unacceptable Uses of AI
- Regular and Substantive Interaction
- Accreditation
- Americans with Disabilities Act (ADA) Academic Accommodations
- Assessment
- Campus Closure and Alternate Instructional Delivery
- Classroom Attendance Policy
- Classroom Recordings (Students and Faculty/Instructors Recording)
- COVID Guidelines and Mask Requirements

- Counseling Center
- Course Evaluation
- Grading
- Withdrawals
- Incomplete Grades
- Grade Change Requests
- Student Concerns
- The Learning Commons
- Tutoring Center

Support contacts explicitly listed in source

- ACCESSibility Services: accessibilityservices@pikespeak.edu, 719.502.3333
- Counseling Center: 719-502-4782, Monday-Friday 8 am-5 pm
- BetterMynd Crisis Hotline: 844-287-6963
- Immediate Learning Commons assistance: 502-2400 (Library Services), 502-3444 (Tutoring Services)

Link placeholders requiring local confirmation

The source references named resources without explicit URLs in extracted text. Confirm/insert official URLs before distribution:

- [INSTRUCTOR CONFIRM] PPSC ACCESSibility Services webpage URL
- [INSTRUCTOR CONFIRM] Accessibility Contact Request Form URL
- [INSTRUCTOR CONFIRM] Assessment landing page URL
- [INSTRUCTOR CONFIRM] PPSC Counseling Center website URL
- [INSTRUCTOR CONFIRM] BetterMynd website URL
- [INSTRUCTOR CONFIRM] Tutoring Center website URL
- [INSTRUCTOR CONFIRM] Learning Commons webpage URL
- [INSTRUCTOR CONFIRM] Brown University LibGuide reference URL

Optional UDL supports (do not change requirements)

- **Engagement options:** Use weekly planning checklists; attend tutoring early; use office/support contacts before deadlines.
- **Representation options:** Review module content in multiple formats available in D2L (text, examples, worked code, class activities).
- **Action and expression options:** Practice with low-stakes drafts/study groups where allowed; verify assignment rules before submission.

These are optional study supports only. They do **not** change grading, attendance, late work, AI policy, or any stated requirement.

Next steps for students

1. Open D2L Course Content and review the Table of Contents.
2. Add drop/withdraw dates and major due dates to your calendar.
3. Confirm required materials access before Week 1.
4. Ask questions early if any policy or expectation is unclear.
5. Contact support services as soon as support is needed.

Formal wording retained from source (machine-extracted appendix)

Note: The appendix below is retained to avoid silent loss of substantive source text during UDL reformatting. It may contain extraction artifacts (for example, duplicated words from layout) and should be reviewed against the original PDF for publication formatting.

Institutional Policies Institutional Policies
Academic Honesty, Plagiarism and Student Conduct Academic Honesty, Plagiarism and Student Conduct
Pikes Peak State College places the highest value on academic honesty and integrity. Students who disregard that value deprive themselves of the learning experience they have invested in and will need for future success. Therefore, you are expected to always do your own work. Academic dishonesty includes but is not limited to submitting material prepared by someone else as your own; plagiarism (passing off another person's ideas, writings, etc., as your own); failure to cite sources adequately or correctly, using electronic data sources such as the internet, phone texting, computer IM, or smart devices such as the smartwatch or AI personal assistants without express permission of the instructor; cheating on tests by using unauthorized materials; having someone else take an online test for you; sharing your work or test answers with another student to submit as their own. If you are unclear on what counts as academic dishonesty, please consult with your instructor.
If it is proven that you have been academically dishonest, the instructor will If it is proven that you have been academically dishonest, the instructor will
impose the appropriate penalty as indicated on the course syllabus, up to a impose the appropriate penalty as indicated on the course syllabus, up to a
zero grade for the test/assignment. For more severe infractions, the zero grade for the test/assignment. For more severe infractions, the
instructor, in consultation with the Executive Dean, may assign a failing instructor, in consultation with the Executive Dean, may assign a failing
grade for the course. grade for the course.

===== PAGE 8 =====

In addition, academic dishonesty violates the PPSC Student Standards of Conduct, and a report will be made to the Dean of Students for possible disciplinary action under the Colorado Community College System Student Behavioral Expectations and Responsibilities (BP 4-30). Disciplinary action may occur for any standards of conduct violations, including in-class behavior which disrupts the instructor's ability to teach and other students' ability to learn. Please review the Student Behavioral Expectations and Responsibilities (Code).
Digital Literacy Policy Digital Literacy Policy
All students are expected to demonstrate digital literacy skills necessary for academic and professional success. This includes the responsible use of technology systems, ethical application of artificial intelligence (AI) tools, and professional communication in digital spaces.
Digital Literacy Expectations Digital Literacy Expectations
- Use the Learning Management System (LMS) regularly to access announcements, assignments, and grades.
- Check college email daily for official communication.
- Access the Student Portal for registration, records, and support

services.
- Use library databases and other academic resources for research and citation.

Artificial Intelligence (AI) Use Artificial Intelligence (AI) Use

Students must follow the AI Policy outlined in the Institutional Syllabus. Individual instructors or departments may set additional expectations regarding the use of generative AI tools in their courses. Students are responsible for reviewing those expectations within each course syllabus and asking their instructor for clarification as needed.

When AI use is permitted, students must disclose when and how AI tools were used using proper citation format. One example may be found at Brown University's LibGuide.

===== PAGE 9 =====

Digital Conduct & Integrity Digital Conduct & Integrity
- Cite all digital and AI sources appropriately.
- Protect personal and institutional data.
- Submit original work and respect copyright.
- Communicate respectfully and professionally in all online spaces.

Technology & Support Technology & Support

Students are responsible for maintaining reliable access to a computer or device capable of running required software and a stable internet connection.Support is available through the PPSC Help Desk, Division of Online Learning, and the 24/7 Help Desk.

The Ethics of Artificial Intelligence The Ethics of Artificial Intelligence

The introduction of generative artificial intelligence (AI) tools (such as ChatGPT, and Lumen) are changing the ways we work, learn, communicate, and think. This is an exciting and challenging time, with great possibilities that also carry serious risks. At PPSC, we acknowledge that there remains a great deal of uncertainty in how to approach the use of these new tools for building online courses, creating new online pedagogies, and communicating with students in higher education. As these technologies rapidly change and evolve, we recognize that we will need to adjust our procedures more quickly than we are normally comfortable with. However, if we can center our approach to the use of AI tools with PPSC's core values, then we can engage with these technologies in ways that will maximize benefits for students, faculty, and instructors while minimizing risks.

Student Use of Artificial Intelligence (AI) Student Use of Artificial Intelligence (AI)

This policy outlines the guidelines and ethical considerations for the use of Artificial Intelligence (AI) technologies within Pikes Peak State College. Its purpose is to ensure that AI is used in a way that enhances learning, respects privacy, maintains academic integrity, and fosters an inclusive educational environment.

===== PAGE 10 =====

Artificial Intelligence, in particular generative AI, refers to the simulation of human intelligence processes by machines, especially computer systems. These processes include learning, reasoning, problem-solving, and understanding language. Instructors may choose from amongst three policies or any combination thereof. Option 1 allows the use of generative AI in a course with proper attribution; Option 2 would allow generative AI use at specified times with proper attribution; and Option 3 does not permit the use of generative AI at all.

Absent a separate clear statement from your course instructor, the following rules will apply to the use of generative AI in Pikes Peak State

College courses.
Acceptable Uses of AI Acceptable Uses of AI
- AI should help you think.AI should help you think. Not think for you. Use of tools to provide
ideas, help outline thoughts, brainstorm, better understand complex
problems only.
- Engage with AI responsibly and ethically.Engage with AI responsibly and ethically. Share the output of AI
ethically and responsibly.
- You are 100% responsible for your final product.You are 100% responsible for your final product. As the user, if AI
makes a mistake, you make a mistake. This means ideas must be
attributed, facts are true, and sources must be verified.
- The use of AI must be open and documentedThe use of AI must be open and documented. You must cite your
use of AI.
Unacceptable Uses of AI Unacceptable Uses of AI
- Academic Dishonesty:Academic Dishonesty: Using AI to complete assignments, projects,
tests, or any other academic work without explicit permission from
the instructor is prohibited.
- Privacy Violations:Privacy Violations: Employing AI to monitor or track individuals
without their consent or in ways that infringe on their privacy rights
is strictly forbidden.
- Bias and Discrimination:Bias and Discrimination: AI applications must not perpetuate or
exacerbate biases or discriminatory practices. All AI tools must be
regularly audited for fairness and inclusivity.
Regular and Substantive Interaction Regular and Substantive Interaction
In September 2023 the US Department of Education clarified the difference
between distance and correspondence education. A key change of that

mandate is the requirement for "regular and substantive interaction" (RSI)
between students and instructors in asynchronous online courses. RSI is
defined by the Department of Education as regular and meaningful
communication between students and instructors, either in real-time or
through asynchronous methods as detailed in Title 34.B.VI.A §600.2 . In
distance education, this RSI should be apparent in course design.
While issues of generative Artificial Intelligence (AI) are evolving, and
PPSC encourages the use of AI as a tool for faculty and instructors within
the classroom, the Department of Education has determined that
"interactions with artificial intelligence . . . will not meet the statutory
requirements for regular and substantive interaction (Federal Register.
Office of Postsecondary Education 2020)." Students can expect that their
instructor(s) will continue to participate regularly and substantively in all
distance education classrooms, and that AI will only be used to
supplement instruction and/or to teach AI literacy skills.
Accreditation Accreditation
PPSC is accredited by the Higher Learning Commission.
Americans with Disabilities Act (ADA) Academic Americans with Disabilities Act (ADA) Academic
Accommodations Accommodations
Any student eligible for and needing academic accommodations due to a
disability is encouraged to speak with the ACCESSibility Services (AS)
Team. The following link provides additional information: PPSC
ACCESSibility Services webpage. You can email
accessibilityservices@pikespeak.edu or contact AS at 719.502.3333. If you
would like ACCESSibility Services to reach out to you directly please
complete this Accessibility Contact Request Form.
Reasonable accommodations are determined through an interactive

process that involves the student and AS specialists. We encourage students with accommodations to discuss them with their instructors as soon as they receive them. Self-advocating for reasonable

===== PAGE 12 =====

accommodations is the responsibility of the student.
AS recommends that students request for reasonable accommodations before the first week of class. But students are welcome to make accommodation requests at any time during the semester. Students and Faculty are encouraged to contact ACCESSibility Services for information and assistance at any time.
Assessment Assessment
The faculty and staff at PPSC are committed to student learning and success. Therefore, students may periodically be asked to participate in an assessment activity for their program or department, or for the college. These activities might include taking a test, providing a writing sample, or speaking on a topic. They are designed to help faculty improve programs and teaching strategies and to promote student growth. For more information, visit the Assessment landing page.
Campus Closure and Alternate Instructional Delivery Campus Closure and Alternate Instructional Delivery
Due to circumstances beyond our control (i.e., natural disasters, extreme and extended inclement weather, pandemics, etc.) the college may change modes of instructional delivery to best accommodate student learning and academic success. If, for example, on-campus classroom instruction becomes unavailable or impossible (due to circumstances beyond our control), instruction may be delivered and provided online.
Classroom Attendance Policy Classroom Attendance Policy
Individuals not enrolled in a class are not permitted to sit in the classroom while the class is in session. Faculty members are required to take attendance and anyone not on the class list will be asked to leave the classroom. The only exception to this procedure is for specially trained interpreters necessary for disabled students. Children are not permitted in classrooms during class meeting times.

===== PAGE 13 =====

Classroom Recordings Classroom Recordings
Students Recording Students Recording
Students may record a class or discussion, including in-person or online classes and discussions, if one or both of the following conditions have been met (see System President's Procedures 19-50):
- The student has an approved disability accommodation, and/or
- The student has received written permission from the person teaching the class.

Faculty/Instructors Recording Faculty/Instructors Recording
Faculty and instructors may record class sessions, including in-person or online classes and discussions. Students should be informed if classes will be recorded. Class recordings by faculty/instructors are for the use of that specific class, unless otherwise approved.
COVID Guidelines and Mask Requirements COVID Guidelines and Mask Requirements
If you are sick, please stay home and notify your instructor. As we move into a new phase for COVID-19, we still need to be careful to take care of each other and the Pikes Peak community. With that in mind, please practice proper hygiene:
- Wash your hands regularly.
- Cover coughs and sneezes.

- Face masks are optional, faculty/instructors and staff may choose to wear masks in the classroom or on campus.
- The Centers for Disease Control recommends that people with COVID symptoms, a positive test, or exposure to someone with COVID-19, should wear a mask.

- If you are symptomatic, please stay home and get tested. - If you are symptomatic, please stay home and get tested.
- Rapid tests are available at many pharmacies and retail outlets.
- Students: If you are sick, stay home and inform your faculty members of your need to stay home.
- Employees: If you are sick, stay home and inform your supervisor of your need to stay home.
- If you test positive for COVID, you must remain off campus for five (5) days following your positive test report. You may return to campus on the sixth (6th) day following the positive COVID test, provided you are fever-free, and your symptoms are resolving. You should continue to You should continue to wear a mask around others for five (5) additional days. wear a mask around others for five (5) additional days.

Counseling Center Counseling Center

The Counseling CenterThe Counseling Center is here for you all year round with free mental health services. Whether you're in crisis, feeling overwhelmed, or just need someone to talk to, we're a call or visit away. Our mission is to support student success through emotional wellness. Your mental health matters year-round. To schedule an appointment, drop in or call 719-502-4782719-502-4782. For more information, visit the PPSC Counseling Center website.

HoursHours: Monday- Friday, 8 am- 5 pm

Locations:Locations:

1. Centennial, A141
2. Rampart, N107C
3. Downtown, S129
4. CHES, 110

For additional telehealth services visit the BetterMynd website and call 844-287-6963 for the BetterMynd Crisis Hotline.

Course Evaluation Course Evaluation

Students are responsible for evaluating their course and instructor using the MyCourses/D2L platform. Access to the evaluation is provided through SSO (Single Sign On), via the "My Surveys" widget on any D2L course homepage. Evaluations become available shortly after the midterm point; look for announcements in your campus email containing a survey access personalized link. Faculty and administrators use the responses collected in the survey to improve classes and programs, and individual instructors use them to improve their teaching. Evaluations are anonymous. Instructors will not see the responses until they have submitted grades, and they will not be able to match responses with individual students.

Grading Grading

See the current PPSC Catalog for important information regarding academic standards and the grading system that applies to your course(s).

Withdrawals Withdrawals

Drop with a refund is possible during the first 15% of the semester. An official withdrawal may also be initiated by the student through 80% of the term resulting in a grade of "W". A "W" grade has no credit and is not computed in the GPA. If you simply stop attending without officially

withdrawing, a grade based on the total points earned will be assigned to you at the end of the semester as per the grading policy listed in the syllabus. This will usually result in an F on your grade report and may not be changed to a W once issued. Consult a current class schedule or the PPSC calendar for the exact dates.
NOTE:NOTE: Your instructor cannot withdraw you; timely withdrawal is a student's responsibility.
NOTE:NOTE: Students using Military and Veterans education benefits must also adhere to their benefit guidelines. Military and Veteran students who are considering withdrawing should contact the MVP office immediately to

understand the potential impacts
Incomplete Grades Incomplete Grades
An incomplete will be issued only if the student has completed more than 75% of the course requirements and has an emergency that cannot be resolved prior to the end of the semester. An incomplete is rarely issued and may pose a risk to your GPA. ALL remaining work must be satisfactorily completed by the contracted date prior to the end of the next semester, or a grade of F will be issued for the course. An Incomplete (I) grade may be removed only when the remaining class objectives are completed by the date indicated on the "Incomplete Course Agreement" form or no later than the end of the next full 15-week semester.
NOTENOTE: Active-duty Army soldiers are required to have incompletes completed within 110 days of the end of the term. The resulting grade change is made by the instructor of record and approved by the appropriate instructional division Executive Dean. Course work not completed within the allotted time will be assigned a Failing (F) grade. Students may not re-enroll in a class in which an incomplete grade is pending, since according to the College's definition of enrollment, they are still enrolled.
Grade Change Requests Grade Change Requests
A change of grade (other than from an Incomplete) is permitted only as a result of faculty/instructor or administrative error in calculating, posting, or recording a grade. A student has one full year from the time in which the grade was issued to submit a written request for a grade reevaluation to the faculty member. Any student who wishes to pursue a change of grade must exhaust the following options in sequence.
- Grade review with faculty/instructor. If no resolution is reached or satisfactory explanation given, then:
- by department if no resolution or satisfactory explanation, then:

- Review by division Executive Dean or Associate Dean. If no resolution is reached or satisfactory explanation given, then:
- Review by the Vice President for Instructional Services, or the appointed Assistant to the Vice President, for final resolution.
Student Concerns Student Concerns
Examples of instructional or course concerns deal with instructor behavior, class policies, and unfair expectations or demands. Any student who wishes to pursue an instructional concern must exhaust the following options in sequence.
- The student must meet with the instructor and attempt to resolve the problem. If no resolution,
- The student must state the concern in writing via PPSC Academic Concern Form and meet with the Department Chair (in the case of an

instructor) or with the Executive Dean/Associate Dean (in the case of a faculty member). Departments may require specific documentation. Please contact the appropriate division. If no resolution,

- The student will meet with the Executive Dean. If the student contests the Executive Dean's decision, he/she must submit the request in writing to the Office of the Assistant to the Vice President for Instructional Services. The request should include documentation of everything that the student wants considered in the decision. The Executive Dean will also submit all written documentation and recommendations. The Vice President for Instructional Services or a designee will notify the student of the decision in writing. This decision will be final.

The Learning Commons The Learning Commons

The mission of the Learning Commons is to promote student persistence by reinforcing the importance of supplemental support, collaborative inquiry, and independent learning. Library, Technology, and Tutoring

Services have merged to allow for increased efficiency and effectiveness in partnering with students to develop lifelong learning strategies. Students Students can access computers, participate in workshops, or request academic can access computers, participate in workshops, or request academic assistance from tutors, faculty, and librarians to meet the academic assistance from tutors, faculty, and librarians to meet the academic demands of courses.demands of courses. There are a variety of other services and resources that can improve the overall student experience at PPSC.
